

19th May 2026.

Dear Parent/Carer,

This half term, our science topic is Rocks and Soils. To deepen our pupils' understanding and enhance their learning experience, we would like the children to complete a project at home. We believe that hands-on, collaborative projects are invaluable in solidifying the concepts we cover in class. Therefore, we are asking each student to complete a Rocks and Soils Project with their family's help. This project aims to engage students in exploring the natural world, developing observational skills, and fostering a love for science through practical experience.

Some examples could include:

- Rock cycle model
- Geological timeline
- Properties of rocks presentation
- Soil layer jar
- Rock identification chart
- Fossil imprints

Please return the finished project to school on Friday 19th June 2026. If your child completes their project on a computer, please bring it in on a USB memory stick. The children will be presenting their projects to the rest of the school on Monday 22nd June 2026.

Thank you for your cooperation and we look forward to seeing the finished projects.

Miss Williams and Miss Dexter,
Year 3 Class Teachers.
